Video Presenting the world as an autistic child might experience it

– I'm not naughty. I'm autistic. For autistic people like me, the world can be a terrifying place. Sometimes sounds feel like my head is exploding. Clothes feel like my skin is burning. And when a tiny thing changes, it feels like my world is ending."

"I'm scared of my own autistic child – BBC News"

Parents are interviewed about the violent tendencies of their children

NOTE: Not all autistic children are violent. The coping skills taught to autistic children by specialists plays a large role in their ability to control themselves during meltdowns. Lack of these support systems plays a large part in parents being unable to provide autistic children the

structure and skills they need, resulting in children unable to control themselves, sometimes leading to violence.
